About Alice Queen Limited (AQX)

The Company has four projects. Two of these projects are in the Torres Strait region of North Queensland being the Horn Island Gold Project (EPM 25520) and the Kaiwalagal Project (EPM 25418). Kaiwalagal is awaiting grant and covers the other major islands within the Kaurareg Archipelago (also known as the Prince of Wales group of islands). There are historic shafts and pits from previous small scale gold mining on most of these islands. In NSW, the Company has two projects situated on the Molong Volcanic Arc, being Looking Glass (EL 8225) and Mendooran (ELA 5207). Together these projects have been chosen for their prospectivity for significant scale porphyry Cu/Au deposits. These projects were selected by AQX's Technical Director, John Holliday, and are situated north of the giant Cadia-Ridgeway mine (50m oz Au + 9m tonnes Cu) operated by Newcrest Mining Limited. John was a principal discoverer of Cadia-Ridgeway and was formerly the Chief Geoscientist at Newcrest.
